### Lateral Lining

### Spot Repairs

### MH Joint Sealing

### Cretex Seal Installation

D.M. Robichaud Associates is a specialty trenchless – “NO DIG” pipeline rehabilitation company established in 1991. We have a staff of 50 skilled technicians and technologists operating a fleet of 25 specialized trucks.

The company has completed virtually every kind of major municipal underground project utilizing it’s trenchless technology methods that include the disciplines of inspections of manholes, main sewers, and lateral services with detailed analysis in all of these conduits to verify all the deficiencies. We then design and install the most cost-effective, long-term (50 year) design, rehabilitative processes available in the industry.

The company is a licensee of several patented processes for all the sewer rehabilitation needs, and is highly skilled in video assessment, manhole sealing, sewer sealing, sewer lining, structural spot repairs, lateral service lining, robotic technologies, engineering, project planning, cost estimates, and specification preparation.

The company is respected for it's unique spot repairs and mainline relining methods in both lateral and sewer mains that have saved municipalities money when open-cut excavation or tunneling is a costly alternative.

*Soft dig in progress*
